MEMBERS

Leon Andrew:

Leon is a Shúhtaot'jñę elder with the Tułít'a Dene Band. He is the Research Director and Chair of the Nę K'ə Dene Ts'jłj (Living on the Land) Forum. He served as a Special Advisor to the ʔehdzo Got'jñę Gots'ė Nákedı (Sahtú Renewable Resources Board) for many years. He has been an advisor to Aboriginal Affairs and Northern Development Canada and the Government of the Northwest Territories on Transboundary Water negotiations with Alberta. Leon was an Access and Benefits negotiator and served on the Canol Heritage Trail Committee for the Tułít'a District during 2004-2006. He has also served on the Board of the Tułít'a Land and Financial Corporation. Leon has provided his research expertise on numerous traditional knowledge studies, assisted and advised GNWT Archeologists from the Prince of Wales Museum, and is also an experienced interpreter in Dene and English languages. He was an active trapper in the Tułít'a area and has first-hand experience of both the positive and negative effects of exploration activities on the environment and traditional economy of the Northwest Territories. Leon is recognized as one of the Sahtú Region's most experienced researchers, and he serves in a leading capacity in various regional, national and international research programs involving research and monitoring: the NWT Water Stewardship Strategy, Mackenzie River Basin Board, the Canadian Mountain Network, Northern Water Futures, and Āramă̄t: Biodiversity Conservation and the Health and Well-being of Indigenous Peoples (New Frontiers in Research Fund of Canada's research Tri-Agency). Leon was appointed to the Species at Risk Committee by the ʔehdzo Got'jñę Gots'ė Nákedı (Sahtú Renewable Resources Board).

Dr. Suzanne Carrière:

Suzanne is the Wildlife Biologist (Biodiversity) in the Wildlife Division of Environment and Climate Change (ECC-GNWT) in Yellowknife. Suzanne is the Departmental authority on biodiversity planning, research, monitoring and management, and is responsible for providing overall direction on biodiversity programs in the NWT. She has worked for the Department since 1996 in her current capacity. She has been a voting member for the NWT on the Committee on Endangered Wildlife in Canada (COSEWIC) since 1998. Suzanne served as a member of the SARC since 2010 and is currently the Alternate Chairperson of the SARC. Suzanne was appointed to the Species at Risk Committee by the Government of the Northwest Territories.

Dr. Nicholas (Nic) Larter:

Nic brings more than 30 years of experience with wildlife and species at risk management in the NWT. He holds B.Sc. degrees from the University of Alaska Fairbanks and M.Sc. and Ph.D degrees in Zoology from the University of British Columbia. His graduate work was on the ecology of the Mackenzie wood bison population. He was the caribou/muskox biologist for the Department of Environment and Climate Change (ECC), Inuvik Region, from 1993-2002 where he conducted field research on the Banks Island ecosystem looking at the relationships between Peary caribou, muskoxen, arctic wolves, arctic hares, their forage and seasonal changes in its availability caused by moisture, snow and ice conditions. He was the Manager of Wildlife Research and Monitoring for the Dehcho Region in Fort Simpson from 2002 until his retirement in 2019. He conducted field research programs on moose, boreal caribou and Nahanni wood bison and harvest studies on Dall's sheep, mountain goats, moose and northern mountain caribou in the Mackenzie mountains. He did extensive research with local harvesters investigating the levels of contaminants in country foods, particularly moose and caribou. During his career with ECC, Nic regularly presented his research to a variety of local, national and international audiences. From 2013-2020 he represented the NWT as a member of the Committee on the Status of Endangered Wildlife in Canada (COSEWIC). He is currently a member of the wood bison species specialist group for the International Union for the Conservation of Nature (IUCN). Nic was appointed to the Species at Risk Committee by the Government of the Northwest Territories.

Lynda Yonge:

Lynda brings more than twenty years of experience with wildlife and species at risk management in the NWT. She holds a B.Sc. degree in Zoology from the University of British Columbia and a Master of Environmental Studies from York University with a specialization in environmentally sustainable development. She worked for the Department of Environment and Climate Change in a variety of positions including Species at Risk Specialist, Wildlife Management Specialist and Director of Wildlife. During that time, she played a key role in developing the collaborative process that resulted in the *Species at Risk (NWT) Act* and the *Wildlife Act* and was a key player in drafting the two acts. She has a strong knowledge of the legislation and processes in place to identify, assess, list and manage/recover species at risk as well as with the tools available to manage wildlife to prevent them from becoming at risk. She has been involved with the management of a wide range of species including polar bears, barren-ground caribou, boreal caribou and wood bison, and brings a personal passion and commitment to conservation. Lynda was appointed to the Species at Risk Committee by the Government of the Northwest Territories.

Petter Jacobsen:

Petter has a Bachelor of Arts in Cultural Anthropology (2008) and a Master of Arts in First Nations Studies and Environmental Studies (2011) from the University of Northern British Columbia. He is the Director and owner of Jacobsen Resources, with his primary client being the Tłıchǫ Government – Dedats'eetsa: Tłıchǫ Research and Training Institute. The majority of his work as Principal Investigator has been organizing and conducting Tłıchǫ knowledge research on barren-ground caribou, migration routes, climate change, and cumulative impacts since 2009. The on-the-land traditional monitoring program "Tłıchǫ Ekwǫ Nàxoède K'è" (formerly the Boots on the Ground program) is Petter's most recent work. Petter was appointed to the Species at Risk Committee by the Government of the Northwest Territories, on the advice of the Conference of Management Authorities.

Sam Bullock:

Sam works with the Dene Nation in Yellowknife as Director of Fisheries (July 2020-present) and is a full member of the Gwich'in Renewable Resources Board. He was born on the land at his "Diidu's" (grandmother's) seasonal fish camp on the Mackenzie River at Dachan Choo Gèhnik (Tree River) and raised by Elders who taught him to respect all life on land, water and air. Sam holds a diploma in Climate Change Management and has worked for the GNWT Department of Resources, Wildlife and Economic Development in Yellowknife. In 1992, Sam and his wife Renata created and operated Bullocks' Bistro, a successful fish 'n' chips eatery in Yellowknife's Oldtown, for 26 years. Sam is currently Chair of the Steering Committee for the *Integrated Fisheries Management Plan for Dolly Varden of the Gwich'in Settlement Area and Inuvialuit Settlement Region* and serves as Alternate Chairperson of the Conference of Management Authorities. Sam brings a lifelong commitment with passionate lived experience in fisheries and wildlife management on a foundation of Gwich'in Elder teachings and a keen interest in scientific observations. Sam was appointed to the Species at Risk Committee by the Government of the Northwest Territories, on the advice of the Conference of Management Authorities.

Robert 'Bobby' Migwi:

Bobby Migwi is from Behchokǫ, Northwest Territories. He has spent his entire life travelling the land with his family harvesting, fishing, and trapping. In the 1970s, he was in one of the last groups to travel to the barrenlands by canoe for caribou harvesting. He continues to pass on his knowledge to the youth of the Tłıchǫ region by bringing them on the land and teaching traditional survival, hunting, and trapping skills. Bobby was appointed to the Species at Risk Committee by the Wek'èezhii Renewable Resources Board.

Darren Campbell:

Darren started out in Ontario and has lived over half his life North of 60° and nearly half his life in the NWT. He began his career in Natural Resources over three decades ago in a Provincial Park in the Boreal Forest as a Junior Ranger near the Nemegosenda River in Northern Ontario. He began college in Communications Science, then moved into Integrated Resources Management, before enrolling at University in British Columbia in Natural Resource Management and Environmental Sciences. He's worked in Ontario's far North, British Columbia's far North, the Yukon and NWT for Industry, First Nations and Government. His NWT experience includes working for two NWT Land and Water Boards, two Territorial government departments and two Indigenous Government Organizations. Darren was appointed to the Species at Risk Committee by the Gwich'in Renewable Resources Board.

Kelby Ogryzlo:

Kelby studied Conservation Biology at the University of Alberta, taking several species at risk and wildlife management courses, and had student summer positions with the Canadian Forest Service doing fieldwork out of Fort Simpson and an internship in Prince Albert National Park. She started her career doing summer fieldwork in northern Alberta with the Alberta Biodiversity Monitoring Institute. Then in the fall, she started a position with the Meteorological Service of Canada releasing weather balloons and making weather observation at the Stony Plain weather station and in the High Arctic at the Eureka Weather Station at 80° latitude on Ellesmere Island. During her time there she missed her work with wildlife and so she wrote an informative booklet about all the wildlife that can be seen in Eureka, including how common they are and their protective statuses. After a year and a half Kelby switched departments within ECCC and started working as a species at risk biologist with the Canadian Wildlife Service in Yellowknife. Over the past year she has worked on several species at risk projects, including co-writing the Wolverine Management Plan, and participated in various wildlife meetings hosted by different management authorities, including attending numerous Conference Management Authority meetings. Kelby was appointed to the Species at Risk Committee by the Canadian Wildlife Service on behalf of the Government of Canada.

ALTERNATE MEMBERS

Aimee Guile:

Aimee works for the Wek'èezhì Renewable Resources Board (WRRB) as a Conservation Biologist where she provides the Board with scientific research, monitoring and management advice on plants, forests, protected areas and species at risk in Wek'èezhì. She has been in this role since May 2018. She previously worked for the Government of the Northwest Territories as a Contaminated Sites Project Manager. Aimee grew up in Yellowknife, Northwest Territories where she fostered her love of the north and the natural world. She has a Bachelor of Science degree in Environmental Science from the University of British Columbia and a Master of Science degree in Environmental Practice from the Royal Roads University. Aimee was appointed to the Species at Risk Committee by the Wek'èezhì Renewable Resources Board.

Robert Charlie-Tetlichì:

Robert was born in Fort McPherson, raised by his parents John Alfred Tetlichì (originally from Old Crow) and Annabella Robert (from Fort McPherson). Robert attended Residential School in Fort McPherson (Fleming Hall) and Inuvik (Stringer Hall). Robert spent his summers at their summer fish camp at Road River, learning traditional skills and conversing mainly in the Gwich'in language. Upon graduation, Robert attended the Adult Vocational Training Center in Fort Smith, taking a course in Basic Electronics. He then joined CN Telecommunications (Northwestel) and worked there as an electronics technician.

Robert has been active as a Counselor for the Inuvik Native Band/Nihtat Gwich'in Council and a Director for the Gwich'in Tribal Council. Robert was the past GRRB Chairperson for over 15 years and was responsible for establishing the office in Inuvik. Robert is currently the Chief of the Inuvik Native Band. Robert would like to see our youth graduate from High School, pursue further studies at a post-secondary institution and return to work for our organizations. Youth should also learn their traditional cultural on-the-land skills. Robert looks forward to working with the Communities and Co-management partners on wildlife, fish and forest management. Robert was appointed to the Species at Risk Committee by the Gwich'in Renewable Resources Board.
